Course Descriptions

S 100 ±~~PREREQS~~ & **D**

3 cr.

This seminar will introduce the basic concepts of communication science and disorders of speech, language, and hearing. Emphasis is placed on the analysis of speech production, comprehension, auditory perception, and the cognitive and social dimensions of language. The role of professionals in diagnosing and treating communication disorders is introduced.

S 103 ±~~PREREQS~~

3 cr.

This course explores the sounds of American English and provides students with the basis for representing speech sound production using the International Phonetic Alphabet (IPA). The course also covers aspects of articulatory and linguistic phonetics and

introduces dialect variation and clinical phonetics with an emphasis on transcriptional phonetics.
